Lightest steel fifth wheel assembly in the industry

• New Fontaine® 6000 Series Fifth Wheel cuts weight without cutting performance or load rating
• Proven design made possible by Finite Element Analysis technology and strategic placement of high strength alloy steel
• 6000 Series No-Slack® fifth wheel combined with NWB mounting bracket is approximately 60 lbs lighter with no reduction in load ratings
• Same legendary No-Slack® locking technology with no change to locking mechanism or components

Lock automatically self-adjusts to the trailer kingpin for a smoother ride, lower maintenance costs and longer component life

Vertical Load Rating: 50,000 lbs
Drawbar Pull Rating: 150,000 lbs

LIGHT in weight... STRONG in performance

Fontaine 6000 Series No-Slack® Fifth Wheel Assembly

Fontaine technology delivers the world’s only self-adjusting fifth wheel lock

- Exclusive No-Slack® design automatically resets the lock to accommodate kingpin wear
- Switch from trailer to trailer hassle-free
- Reduces shock inputs into the frame when braking and accelerating
- Improves driver comfort
- Reduces driver complaints
- Extends service life of other components

No-Slack® technology adjusts the lock automatically to accommodate various kingpin diameters as you connect from trailer to trailer.

Built in secondary lock provides added security.

Locking trigger helps minimize high-hitching to reduce tractor, trailer and tire damage.

Easiest straight pull handle in the industry. Just pull the handle to open the lock—no complicated opening sequence to remember.

Optional in-cab air release allows driver to open the lock from inside the cab for greater convenience—only works when the parking brake is set to help prevent mishaps.

Steel reinforcement for greater strength and larger surface contact area for improved stability.

Lightest steel fifth wheel assembly in the industry.
