The Fontaine® Fifth Wheel Bracket Exchange Program

The purpose of the Bracket Exchange Program is to provide a method for OE Truck Dealers to exchange brackets for new tractors, not yet licensed or put into service, with no restock charge. The OE Dealer will be charged for paint removal and freight charges. Note: if you are returning a bracket for a more expensive bracket the difference in cost will also be applied (i.e.: BKTATB6PT for a BKTATB10PT).

PROGRAM:

- Includes standard PMA adjustable plate mounts, PLA/PSA stationary plate mounts and sliding fifth wheel brackets only (Some special brackets called "D" number product may be included in this program. Contact Customer Service.)
- Brackets with stationary welded mounting angles and blocked brackets are excluded.

EXCHANGE PROCEDURE:

- The dealer should first contact Fontaine's Customer Service Department (1-800-874-9780) to request a bracket exchange. The dealer must provide new replacement bracket specification (model number) of bracket that is being replaced.
- The dealer will then place the order through their aftermarket program for the new replacement bracket.
- Fontaine will bill the new bracket upon shipment.
- Fontaine will ship the new bracket freight collect or prepaid and added to the OEM invoice.
- After the new bracket has been installed, the OE Dealer should call Fontaine's Customer Service Department and obtain a RMA number for the bracket being returned.
- The return must be shipped within 7 working days of the RMA issue date. If the product is not shipped within 7 days a 25% restocking charge will automatically be applied.
- All returned brackets must be sent freight prepaid or collect (freight charges will be deducted from RMA credit on bracket). The RMA number should be on the bill of lading.
- All returned brackets must be returned clean, with all parts attached, palletized and in resalable condition.
- Fontaine will issue credit upon receipt and inspection of the returned bracket. The credit will be issued through the applicable OEM.
